

# Azalea Health Billing Assistant

Simplify claims management and accelerate reimbursements with intelligent automation powered by AI.

**Fewer Errors. Faster Payments. Less Manual Work.**

Medical billing is time-consuming and error-prone, with complex coding rules and manual processes slowing down reimbursements. Azalea's Billing Assistant streamlines claims management with AI-powered automation, catching errors before submission and prioritizing follow-ups. By reducing administrative burden, it helps billing teams work smarter and recover revenue faster.

## Optimize Claims Before Submission

75% of preventable claims are caused by coding errors. Billing Assistant reviews claims in real time, detecting potential issues before submission and providing actionable insights. By reducing errors upfront, it minimizes costly rework and increases first-pass claim approvals—helping practices get paid faster.

## Streamline Claim Follow-Ups

Manually tracking claim statuses is tedious and inefficient. Billing Assistant automates this process for electronically supported payers, covering 84% of claims. By easily identifying the claims that are processing and need no intervention, billers can focus on the claims that require attention—reducing wasted time and accelerating reimbursements.

With intelligent automation, Billing Assistant reduces denials, increases efficiency, and helps practices get paid faster.

## Smarter Billing. Measurable Results.

**68%**

More claims approved on the first submission, reducing costly delays

**66%**

Less time spent on follow-ups, eliminating unnecessary manual claim tracking.

**+\$15k**

Faster revenue collection, accelerating cash flow and improving financial stability.
